GREIWING logistics group

STRONG PARTNERS
for the plastics industry.

GREIWING
| logistics for you®

separation® AG

optical sorting service

WE UNDERSTAND plastic.

Our company group has more than 1,200 employees working at over 20 sites across Germany and one site in Belgium. As a logistics service provider, we specialise in delving deep into our customers' value chains. Our knowledge and specialist equipment bring particular benefits to the chemicals, plastics, food, paint and lacquer, construction, and hazardous materials industries.

Benefits for you as a manufacturer:

Long-lasting efficiency for the use of your production capacity.

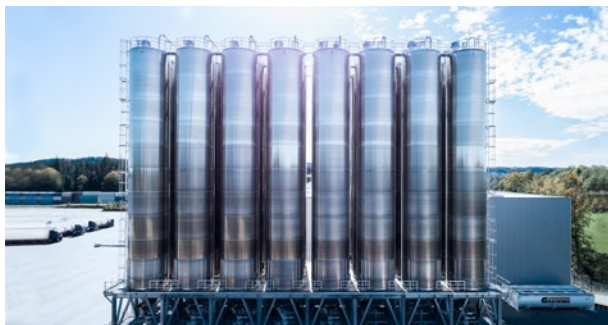

Benefits for you as a processor:

Consistently high quality of raw materials in the exact quantity you need for processing.

GREIWING STANDS FOR AN AWARENESS OF QUALITY and for sustainability.

GREIWING embodies our commitment to quality based on 90 years of experience and signifies our promise to you that we follow a responsible and long-term mindset throughout our activities. This is why we want to be more to you than just another provider of services for free-flowing products from the food and non-food segment. We see ourselves as a strong partner and professional advisor at your side.

GREIWING is the people who pull together and put their all into making this a reality – for you.

STRONG PERFORMANCE

in your value chain:

- Filling
- Crushing / grinding
- Storage
- Logistics consulting
- Mixing / homogenising
- Sample shipping
- Quality control
- Sieving
- Sorting
- Transport
- Drying
- Refilling / debagging

OUR GRANULE SORTING SYSTEMS *offer you:*

- Optoelectronic sorting to remove optically identifiable deviations: *black specks, spots, nozzle tears, etc.*
- Screening of shape and size deviations: *husks, longs, etc.*
- Reconditioning and recovery of damaged products and packaging: *for example due to storage and transport damage, including directly from the truck*
- Removal of foreign substances: *for example packaging remnants, label remnants, wood, cardboard, paper, foil, metal, etc.*
- Removal of shape deviations: *double grain, fragments, grit, oversize or undersize grain, etc.*
- Dust removal: *fine dust, angel hair, snake skin, flakes, foils, metal dust, etc.*
- Removal of surface adhesion: *powder, dust, dirt particles, etc.*

THE MOBILE GRANULE CLINIC®

offers unique flexibility.

We have developed a method that enables you to sort your granules in any location. This means that your product doesn't go off to be sorted – the “sorter” comes to the product.

The system is installed in a 20-foot refrigerated container on a chassis and is ready to run at your site in just a few hours. The straightforward and safe process in our **Mobile Granule Clinic®** combines four separation techniques that we have developed specially for plastic-specific sorting tasks. This means that we can always use the right technology for you.

WHEN SHALL *we get started?*

If you want to maximise your plastic quality for the long term and need a partner to support you throughout the entire value chain, we should get together and discuss the possibilities.
